April 25, 1991

Ron Day and Alan Terril
Rancho Equipment Services
Delta, Utah 84624

Dear Mr. Day and Mr. Terril:

After reviewing the plan of operation you submitted on April 4, 1991, to establish a rock quarry on the south end of Topaz Mountain; I find that additional information is needed before we can prepare an environmental assessment (EA) of your proposal. Before we can proceed with the EA, the following additional or clarified information is needed:

1. A more detailed map which portrays existing roads, proposed new roads, specific areas to be mined and in what sequence, location of topsoil stockpile, waste material storage, etc.
2. Your plan lacks detail on how the quarry will be mined, i.e., will it be all one level, benched levels, will blasting be necessary, etc.
3. The plan should include the name of the mining claims and their serial numbers.
4. Measures which will be taken to prevent unnecessary or undue degradation and what measures will be taken to reclaim disturbed areas after mining is completed.
5. Both BLM and the State require that you obtain a bond before your plan will be approved. BLM will accept your bond with the State as being adequate so that two separate bonds are not required.
6. Your plan contains a list of equipment which is apparently owned by Rancho Equipment Service, but there is no explanation as to which phase would be used in the mining operation nor how it would be used.

Please submit the additional information at your earliest convenience so we can reconsider your proposal.

RE: Rancho Mobile Homes, Inc. DBA Rancho Equipment Services and Alan Terrill

Dear Mr. Allrard:

We will restore the land as close as possible on Section 21, T135 R11 West, after our mining operation is over. We will also put an 18 inch culvert in where our approach meets the Brush highway.

We will utilize the existing roads to haul on, from the crushing site to the Brush road as detailed on the map. This road begins on Claim Nos. 7 and 8 and goes through Claim No. 5 to the paved road, we will install lime chat on the road to control dust, etc. Approximately ten acres of land will be leveled for stockpile and work area.

We would like to start stripping on May 6, 1991. The road construction will begin at the same time. We will have two hundred thousand tons per year for ten years.

Sincerely,

Rancho Equipment Services
Ron Day

Alan Terrill

Re: Rancho Mobile Homes Inc. DBA Rancho Equipment Services
and Alan Terril

Dear Mr. Allrard:

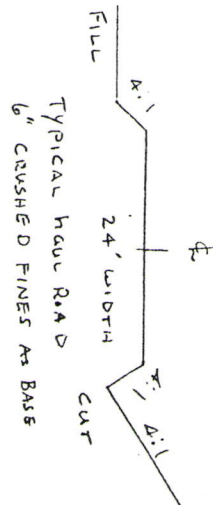

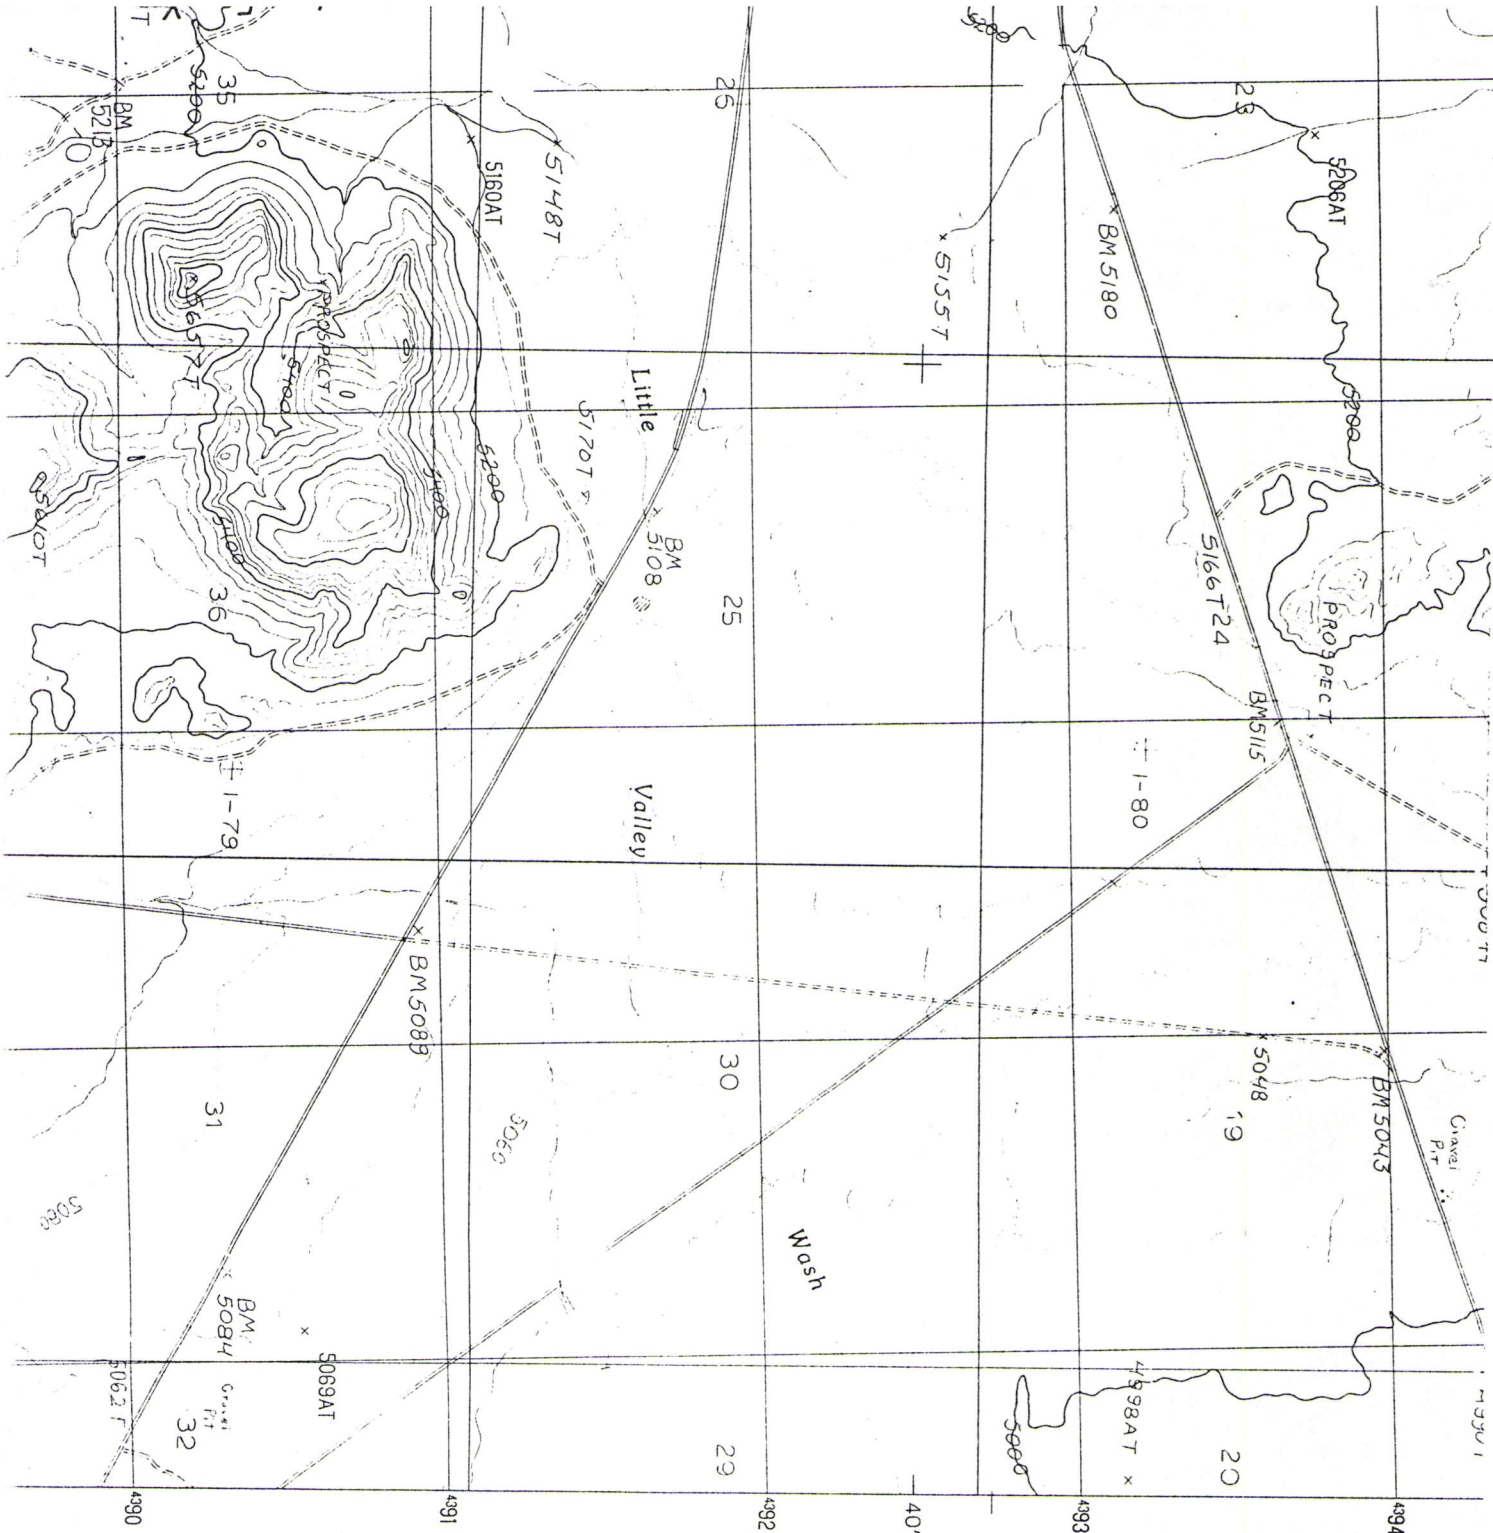

On April 20, 1991, we would like to start drilling about 30
holes on claims #7 & 8 in the Southeast Quarter and Southwest
Quarter of Section 21, T13S, R11 West. The claims are owned
by Alan Terril and Rancho Equipment Services.

Reverse Promises To 43 C F R. 3809.

Sincerely,

Rancho Equipment Services

DIVISION OF
OIL GAS & MINING

Dear Mr. Day and Mr. Terril:

Your notice to conduct mining related operations on your claims in T. 13 S., R. 11 W., Section 21, has been received and accepted by this office. Your notice has been assigned case file number UT-055-01-04N. Please use this number in any future correspondence concerning this notice.

This acceptance is limited to your drilling proposal. We will need to prepare an Environmental Assessment (EA) before we can approve your mining proposal. We strive to complete the EA process in 30 days; however, we have had some recent changes in personnel. This means we may need an additional 60 days to complete the processing of your mine proposal. In order to expedite the review process, I suggest that we meet in Fillmore at your earliest convenience to discuss this situation.

If you change your operation from what is described in your notice, please contact this office prior to the change. If your operations extend for more than one year, please advise this office of the status of your mining related activity on the anniversary date of your notice.

A copy of your notice has been sent to the Utah Division of Oil, Gas and Mining (DOGM); therefore, you will not have to file this notice with DOGM. However, reclamation under this notice is required to conform to the standards of the Utah Mined Land Reclamation Act. Also, all mining claimants and operators that plan to use, store, or divert water are required by Utah statute to notify the Utah Department of Water Resources at:

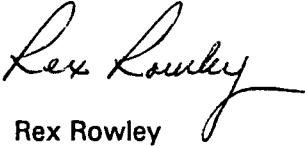

1636 West North Temple
Salt Lake City, UT 84180-1203

As required by 43 CFR 3809, Surface Management Regulations, reasonable measures must be taken to prevent unnecessary or undue degradation of public lands during your operations. Please notify this office upon completion of operations and reclamation, so an inspection may be conducted on the site.

Acceptance of your notice will not now, nor in the future, serve as a determination of the validity nor ownership of any mining claim included under your notice.

Thank you for submitting your notice. If you have any questions regarding this letter please contact me at (801) 743-6811.

Sincerely,

A handwritten signature in black ink, appearing to read "Rex Rowley", with a long horizontal flourish extending to the right.
